| <b>50</b><br>Overall | <b>50</b><br>User Experience | <b>41</b><br>SEO / Local | <b>59</b><br>AI Search |
|----------------------|------------------------------|--------------------------|------------------------|

## Executive summary

The site is crawlable, but the highest-leverage fixes are about clarity, trust, and structured business signals. Prioritize the high-severity items first so visitors and AI answer engines can quickly understand who the business serves and how to contact it.

The fastest wins are usually clarity, trust, crawlability, structured data, and answer-style content - not expensive enterprise theater.

## Why this audit matters

Customers are starting to search differently. Instead of only typing keywords into Google, many now ask AI tools direct questions like 'who should I hire?' or 'what company can help me with this?' To show up in those answers, your website needs to make your business easy to understand: clear services, location or audience signals, trust proof, structured content, and obvious next steps.

**This audit checks whether your site gives Google and AI tools enough information to confidently understand and recommend your business.**

## Top fixes to prioritize

1. Make the title tag more descriptive: Expand the title with the main service and location or target customer.
2. Add a meta description: Add a one-sentence description of who you help, what you do, and how to contact you.
3. Add one plain-language H1: Use one headline that says exactly what the business is and who it serves.

## What Illusion checks

Service clarity, location or audience clarity, trust signals, crawlability, structured data, FAQ answerability, CTA clarity, content depth, and AI crawler access. This PDF does not include Lighthouse or Core Web Vitals testing.

## How Illusion helps after the audit

Illusion helps small businesses answer a simple question: when potential customers ask Google or AI tools for recommendations, does your business show up - or do your competitors? The first step is making sure your website clearly explains what you do, who you help, why someone should trust you, and how to contact you.

**Once the basic website fixes are live, Illusion can track whether AI answer engines actually mention the business for the questions customers ask.**

# Detailed Findings

## 1. Make the title tag more descriptive

MEDIUM / SEO

Evidence: Current title: "Hostinger Horizons"

**Fix: Expand the title with the main service and location or target customer.**

Expected impact: Improves search snippets and gives AI systems a clearer label for the business.

Effort: low

## 2. Add a meta description

MEDIUM / SEO

Evidence: The homepage has no meta description.

**Fix: Add a one-sentence description of who you help, what you do, and how to contact you.**

Expected impact: Improves click appeal in search and gives AI summarizers a clean business description.

Effort: low

## 3. Add one plain-language H1

HIGH / CONTENT

Evidence: The homepage does not have a visible H1 heading.

**Fix: Use one headline that says exactly what the business is and who it serves.**

Expected impact: Makes the page easier for visitors and answer engines to classify.

Effort: low

## 4. Add a strong contact call to action

HIGH / USER EXPERIENCE

Evidence: The crawler did not find obvious phrases like book, call, schedule, contact, or get a quote.

**Fix: Place a visible CTA near the top of the homepage and repeat it on service pages.**

Expected impact: More visitors will know the next step, and AI summaries can mention how to engage the business.

Effort: low

## 5. Show contact information in crawlable text

HIGH / LOCAL SEO

Evidence: No email address or US-style phone number was found in the crawled text.

**Fix: Add phone/email details in the header, footer, or contact section as real text, not only inside an image.**

Expected impact: Builds trust for local customers and gives search engines verifiable business signals.

Effort: low

## 6. Add LocalBusiness or ProfessionalService schema

HIGH / STRUCTURED DATA

Evidence: Detected schema types: none

**Fix: Add JSON-LD with business name, URL, phone, address/service area, opening hours, and sameAs profiles.**

Expected impact: Structured data helps Google and AI systems confidently identify the business entity.

Effort: medium

## 7. Add local service-area signals

MEDIUM / LOCAL SEO

Evidence: The crawled pages did not show strong location or service-area language.

**Fix: Mention the city, region, or service area in headings, footer copy, and service descriptions.**

Expected impact: Local customers and local-intent searches need geographic confidence.

Effort: low

## 8. Add reviews or testimonials

MEDIUM / USER EXPERIENCE

Evidence: No review/testimonial language was detected.

**Fix: Add 2-4 real customer testimonials, review snippets, or links to Google Business reviews.**

Expected impact: Trust proof matters for humans and gives AI systems third-party-style evidence to summarize.

Effort: low

## 9. Add a short FAQ section

MEDIUM / AI SEARCH

Evidence: No FAQ-style content was detected.

**Fix: Add answers to common buyer questions: pricing, turnaround time, who you serve, and when to contact you.**

Expected impact: Question-answer content maps directly to how people ask ChatGPT, Claude, and Google AI Overviews.

Effort: low

# Signals And Pages

## Business signals

| Signal                       | Status        |
|------------------------------|---------------|
| Crawlable email or phone     | Needs work    |
| Visible call to action       | Needs work    |
| Reviews or testimonials      | Needs work    |
| FAQ / answer content         | Needs work    |
| Dedicated service pages      | Present       |
| Location or audience signal  | Needs work    |
| Useful local/business schema | Needs work    |
| Sitemap discovered           | Present       |
| AI crawler blocks detected   | None detected |

## Pages crawled

| Page                                                                                                                    | Signals                                |
|-------------------------------------------------------------------------------------------------------------------------|----------------------------------------|
| Hostinger Horizons<br><a href="https://jgbookkeepingfinance.com/">https://jgbookkeepingfinance.com/</a>                 | status 200 / 2 words / 0 H1 / 0 schema |
| Hostinger Horizons<br><a href="https://jgbookkeepingfinance.com/services">https://jgbookkeepingfinance.com/services</a> | status 200 / 2 words / 0 H1 / 0 schema |
| Hostinger Horizons<br><a href="https://jgbookkeepingfinance.com/about">https://jgbookkeepingfinance.com/about</a>       | status 200 / 2 words / 0 H1 / 0 schema |
| Hostinger Horizons<br><a href="https://jgbookkeepingfinance.com/contact">https://jgbookkeepingfinance.com/contact</a>   | status 200 / 2 words / 0 H1 / 0 schema |
| Hostinger Horizons<br><a href="https://jgbookkeepingfinance.com/why-us">https://jgbookkeepingfinance.com/why-us</a>     | status 200 / 2 words / 0 H1 / 0 schema |

## Suggested next step

Fix the top 2-3 issues first, then rerun the audit. The goal is to make the site easier for customers, Google, and AI answer engines to understand before investing in heavier SEO or AI visibility work.
