AI Search

Executive summary

The site has a solid foundation for customers and AI search. The next gains come from adding more specific service, location, FAQ, and trust proof signals.

The fastest wins are usually clarity, trust, crawlability, structured data, and answer-style content - not expensive enterprise theater.

Why this audit matters

Customers are starting to search differently. Instead of only typing keywords into Google, many now ask AI tools direct questions like 'who should I hire?' or 'what company can help me with this?' To show up in those answers, your website needs to make your business easy to understand: clear services, location or audience signals, trust proof, structured content, and obvious next steps.

This audit checks whether your site gives Google and AI tools enough information to confidently understand and recommend your business.

Top fixes to prioritize

1. Add a clear homepage title tag: Write a concise title that includes the business name, primary service, and location or audience.

What Illusion checks

Service clarity, location or audience clarity, trust signals, crawlability, structured data, FAQ answerability, CTA clarity, content depth, and AI crawler access. This PDF does not include Lighthouse or Core Web Vitals testing.

How Illusion helps after the audit

Illusion helps small businesses answer a simple question: when potential customers ask Google or AI tools for recommendations, does your business show up - or do your competitors? The first step is making sure your website clearly explains what you do, who you help, why someone should trust you, and how to contact you.

Once the basic website fixes are live, Illusion can track whether AI answer engines actually mention the business for the questions customers ask.

Detailed Findings

1. Add a clear homepage title tag

HIGH / SEO

Evidence: The homepage does not expose a title tag.

Fix: Write a concise title that includes the business name, primary service, and location or audience.

Expected impact: Helps Google, AI crawlers, and customers understand what the business does before opening the page.

Effort: low

Signals And Pages

Business signals

Signal	Status

Sitemap discovered	Present
AI crawler blocks detected	None detected

Pages crawled

Page	Signals
(No title) https://www.arcandledger.com/	status 200 / 896 words / 1 H1 / 33 schema
(No title) https://www.arcandledger.com/services/bookkeeping/	status 200 / 1175 words / 1 H1 / 31 schema
(No title) https://www.arcandledger.com/services/tax-preparation/	status 200 / 1235 words / 1 H1 / 31 schema
(No title) https://www.arcandledger.com/services/tax-resolution/	status 200 / 1289 words / 1 H1 / 31 schema
(No title) https://www.arcandledger.com/culver-city-tax-services/	status 200 / 1224 words / 1 H1 / 31 schema
(No title) https://www.arcandledger.com/services/individual-tax/	status 200 / 1260 words / 1 H1 / 31 schema

Suggested next step

Fix the top 2-3 issues first, then rerun the audit. The goal is to make the site easier for customers, Google, and AI answer engines to understand before investing in heavier SEO or AI visibility work.
