AI Search

Executive summary

The site has a solid foundation for customers and AI search. The next gains come from adding more specific service, location, FAQ, and trust proof signals.

The fastest wins are usually clarity, trust, crawlability, structured data, and answer-style content - not expensive enterprise theater.

Why this audit matters

Customers are starting to search differently. Instead of only typing keywords into Google, many now ask AI tools direct questions like 'who should I hire?' or 'what company can help me with this?' To show up in those answers, your website needs to make your business easy to understand: clear services, location or audience signals, trust proof, structured content, and obvious next steps.

This audit checks whether your site gives Google and AI tools enough information to confidently understand and recommend your business.

Top fixes to prioritize

1. Add LocalBusiness or ProfessionalService schema: Add JSON-LD with business name, URL, phone, address/service area, opening hours, and sameAs profiles.

What Illusion checks

Service clarity, location or audience clarity, trust signals, crawlability, structured data, FAQ answerability, CTA clarity, content depth, and AI crawler access. This PDF does not include Lighthouse or Core Web Vitals testing.

How Illusion helps after the audit

Illusion helps small businesses answer a simple question: when potential customers ask Google or AI tools for recommendations, does your business show up - or do your competitors? The first step is making sure your website clearly explains what you do, who you help, why someone should trust you, and how to contact you.

Once the basic website fixes are live, Illusion can track whether AI answer engines actually mention the business for the questions customers ask.

Detailed Findings

1. Add LocalBusiness or ProfessionalService schema

HIGH / STRUCTURED DATA

Evidence: Detected schema types: none

Fix: Add JSON-LD with business name, URL, phone, address/service area, opening hours, and sameAs profiles.

Expected impact: Structured data helps Google and AI systems confidently identify the business entity.

Effort: medium

Signals And Pages

Business signals

Signal	Status

Pages crawled

Page	Signals
Luna Home Comfort Trusted HVAC Services in Greater Seattle, WA https://www.lunahomecomfort.com/	status 200 / 1250 words / 1 H1 / 0 schema
(No title) https://www.lunahomecomfort.com/services	status 200 / 1247 words / 1 H1 / 0 schema
(No title) https://www.lunahomecomfort.com/about	status 200 / 926 words / 1 H1 / 0 schema
Terms of Service Apostle Flooring and Painting LLC https://www.lunahomecomfort.com/terms-of-service	status 200 / 812 words / 1 H1 / 0 schema
(No title) https://www.lunahomecomfort.com/contact	status 200 / 618 words / 1 H1 / 0 schema
(No title) https://www.lunahomecomfort.com/gallery	status 200 / 685 words / 1 H1 / 0 schema

Suggested next step

Fix the top 2-3 issues first, then rerun the audit. The goal is to make the site easier for customers, Google, and AI answer engines to understand before investing in heavier SEO or AI visibility work.
