

AI WEBSITE AUDIT / SMALL BUSINESS READINESS

Your AI search readiness report

luminahrservices.com

Prepared by Illusion on 2026-05-25

76 Overall	84 User Experience	68 SEO / Local	75 AI Search
---------------	-----------------------	-------------------	-----------------

Executive summary

The site is crawlable, but the highest-leverage fixes are about clarity, trust, and structured business signals. Prioritize the high-severity items first so visitors and AI answer engines can quickly understand who the business serves and how to contact it.

The fastest wins are usually clarity, trust, crawlability, structured data, and answer-style content - not expensive enterprise theater.

Why this audit matters

Customers are starting to search differently. Instead of only typing keywords into Google, many now ask AI tools direct questions like 'who should I hire?' or 'what company can help me with this?' To show up in those answers, your website needs to make your business easy to understand: clear services, location or audience signals, trust proof, structured content, and obvious next steps.

This audit checks whether your site gives Google and AI tools enough information to confidently understand and recommend your business.

Top fixes to prioritize

1. Show contact information in crawlable text: Add phone/email details in the header, footer, or contact section as real text, not only inside an image.
2. Add LocalBusiness or ProfessionalService schema: Add JSON-LD with business name, URL, phone, address/service area, opening hours, and sameAs profiles.
3. Add a short FAQ section: Add answers to common buyer questions: pricing, turnaround time, who you serve, and when to contact you.

What Illusion checks

Service clarity, location or audience clarity, trust signals, crawlability, structured data, FAQ answerability, CTA clarity, content depth, and AI crawler access. This PDF does not include Lighthouse or Core Web Vitals testing.

How Illusion helps after the audit

Illusion helps small businesses answer a simple question: when potential customers ask Google or AI tools for recommendations, does your business show up - or do your competitors? The first step is making sure your website clearly explains what you do, who you help, why someone should trust you, and how to contact you.

Once the basic website fixes are live, Illusion can track whether AI answer engines actually mention the business for the questions customers ask.

Detailed Findings

1. Show contact information in crawlable text

HIGH / LOCAL SEO

Evidence: No email address or US-style phone number was found in the crawled text.

Fix: Add phone/email details in the header, footer, or contact section as real text, not only inside an image.

Expected impact: Builds trust for local customers and gives search engines verifiable business signals.

Effort: low

2. Add LocalBusiness or ProfessionalService schema

HIGH / STRUCTURED DATA

Evidence: Detected schema types: BreadcrumbList, EntryPoint, ListItem, PropertyValueSpecification, ReadAction, SearchAction, WebPage, WebSite

Fix: Add JSON-LD with business name, URL, phone, address/service area, opening hours, and sameAs profiles.

Expected impact: Structured data helps Google and AI systems confidently identify the business entity.

Effort: medium

3. Add a short FAQ section

MEDIUM / AI SEARCH

Evidence: No FAQ-style content was detected.

Fix: Add answers to common buyer questions: pricing, turnaround time, who you serve, and when to contact you.

Expected impact: Question-answer content maps directly to how people ask ChatGPT, Claude, and Google AI Overviews.

Effort: low

Signals And Pages

Business signals

Signal	Status
Crawlable email or phone	Needs work
Visible call to action	Present
Reviews or testimonials	Present
FAQ / answer content	Needs work
Dedicated service pages	Present
Location or audience signal	Present
Useful local/business schema	Needs work
Sitemap discovered	Present
AI crawler blocks detected	None detected

Pages crawled

Affordable HR Services Los Angeles, CA - Lumina HR Services https://luminahrservices.com/pricings/	status 200 / 1198 words / 1 H1 / 8 schema

Suggested next step

Fix the top 2-3 issues first, then rerun the audit. The goal is to make the site easier for customers, Google, and AI answer engines to understand before investing in heavier SEO or AI visibility work.
