

AI WEBSITE AUDIT / SMALL BUSINESS READINESS

Your AI search readiness report

balancedflowyoga.net

Prepared by Illusion on 2026-05-25

78 Overall	82 User Experience	69 SEO / Local	82 AI Search
----------------------	------------------------------	--------------------------	------------------------

Executive summary

The site is crawlable, but the highest-leverage fixes are about clarity, trust, and structured business signals. Prioritize the high-severity items first so visitors and AI answer engines can quickly understand who the business serves and how to contact it.

The fastest wins are usually clarity, trust, crawlability, structured data, and answer-style content - not expensive enterprise theater.

Why this audit matters

Customers are starting to search differently. Instead of only typing keywords into Google, many now ask AI tools direct questions like 'who should I hire?' or 'what company can help me with this?' To show up in those answers, your website needs to make your business easy to understand: clear services, location or audience signals, trust proof, structured content, and obvious next steps.

This audit checks whether your site gives Google and AI tools enough information to confidently understand and recommend your business.

Top fixes to prioritize

1. Make the title tag more descriptive: Expand the title with the main service and location or target customer.
2. Add a meta description: Add a one-sentence description of who you help, what you do, and how to contact you.
3. Make the main headline more specific: Add the service, audience, and location instead of using a short brand-only headline.

What Illusion checks

Service clarity, location or audience clarity, trust signals, crawlability, structured data, FAQ answerability, CTA clarity, content depth, and AI crawler access. This PDF does not include Lighthouse or Core Web Vitals testing.

How Illusion helps after the audit

Illusion helps small businesses answer a simple question: when potential customers ask Google or AI tools for recommendations, does your business show up - or do your competitors? The first step is making sure your website clearly explains what you do, who you help, why someone should trust you, and how to contact you.

Once the basic website fixes are live, Illusion can track whether AI answer engines actually mention the business for the questions customers ask.

Detailed Findings

1. Make the title tag more descriptive

MEDIUM / SEO

Evidence: Current title: "Balanced Flow Yoga"

Fix: Expand the title with the main service and location or target customer.

Expected impact: Improves search snippets and gives AI systems a clearer label for the business.

Effort: low

2. Add a meta description

MEDIUM / SEO

Evidence: The homepage has no meta description.

Fix: Add a one-sentence description of who you help, what you do, and how to contact you.

Expected impact: Improves click appeal in search and gives AI summarizers a clean business description.

Effort: low

3. Make the main headline more specific

MEDIUM / CONTENT

Evidence: Current H1: "Balanced Flow Yoga"

Fix: Add the service, audience, and location instead of using a short brand-only headline.

Expected impact: Improves human comprehension and AI answer quality.

Effort: low

4. Add local service-area signals

MEDIUM / LOCAL SEO

Evidence: The crawled pages did not show strong location or service-area language.

Fix: Mention the city, region, or service area in headings, footer copy, and service descriptions.

Expected impact: Local customers and local-intent searches need geographic confidence.

Effort: low

5. Add reviews or testimonials

MEDIUM / USER EXPERIENCE

Evidence: No review/testimonial language was detected.

Fix: Add 2-4 real customer testimonials, review snippets, or links to Google Business reviews.

Expected impact: Trust proof matters for humans and gives AI systems third-party-style evidence to summarize.

Effort: low

6. Add a short FAQ section

MEDIUM / AI SEARCH

Evidence: No FAQ-style content was detected.

Fix: Add answers to common buyer questions: pricing, turnaround time, who you serve, and when to contact you.

Expected impact: Question-answer content maps directly to how people ask ChatGPT, Claude, and Google AI Overviews.

Effort: low

7. Improve image alt text coverage

LOW / SEO

Evidence: 4/6 crawled images had alt text.

Fix: Add descriptive alt text to important images, especially logos, team photos, service graphics, and trust badges.

Expected impact: Improves accessibility and gives crawlers more context.

Effort: low

Signals And Pages

Business signals

Signal	Status
Crawlable email or phone	Present

Contact - Balanced Flow Yoga http://www.balancedflowyoga.net/contact	status 200 / 93 words / 2 H1 / 3 schema

Suggested next step

Fix the top 2-3 issues first, then rerun the audit. The goal is to make the site easier for customers, Google, and AI answer engines to understand before investing in heavier SEO or AI visibility work.
