100

AI Search

Executive summary

The site has a solid foundation for customers and AI search. The next gains come from adding more specific service, location, FAQ, and trust proof signals.

The fastest wins are usually clarity, trust, crawlability, structured data, and answer-style content - not expensive enterprise theater.

Why this audit matters

Customers are starting to search differently. Instead of only typing keywords into Google, many now ask AI tools direct questions like 'who should I hire?' or 'what company can help me with this?' To show up in those answers, your website needs to make your business easy to understand: clear services, location or audience signals, trust proof, structured content, and obvious next steps.

This audit checks whether your site gives Google and AI tools enough information to confidently understand and recommend your business.

Top fixes to prioritize

1. Add local service-area signals: Mention the city, region, or service area in headings, footer copy, and service descriptions.
2. Add reviews or testimonials: Add 2-4 real customer testimonials, review snippets, or links to Google Business reviews.
3. Improve image alt text coverage: Add descriptive alt text to important images, especially logos, team photos, service graphics, and trust badges.

What Illusion checks

Service clarity, location or audience clarity, trust signals, crawlability, structured data, FAQ answerability, CTA clarity, content depth, and AI crawler access. This PDF does not include Lighthouse or Core Web Vitals testing.

How Illusion helps after the audit

Illusion helps small businesses answer a simple question: when potential customers ask Google or AI tools for recommendations, does your business show up - or do your competitors? The first step is making sure your website clearly explains what you do, who you help, why someone should trust you, and how to contact you.

Once the basic website fixes are live, Illusion can track whether AI answer engines actually mention the business for the questions customers ask.

Detailed Findings

1. Add local service-area signals

MEDIUM / LOCAL SEO

Evidence: The crawled pages did not show strong location or service-area language.

Fix: Mention the city, region, or service area in headings, footer copy, and service descriptions.

Expected impact: Local customers and local-intent searches need geographic confidence.

Effort: low

2. Add reviews or testimonials

MEDIUM / USER EXPERIENCE

Evidence: No review/testimonial language was detected.

Fix: Add 2-4 real customer testimonials, review snippets, or links to Google Business reviews.

Expected impact: Trust proof matters for humans and gives AI systems third-party-style evidence to summarize.

Effort: low

3. Improve image alt text coverage

LOW / SEO

Evidence: 12/20 crawled images had alt text.

Fix: Add descriptive alt text to important images, especially logos, team photos, service graphics, and trust badges.

Expected impact: Improves accessibility and gives crawlers more context.

Effort: low

Signals And Pages

Business signals

Signal	Status
Crawlable email or phone	Present
Visible call to action	Present
Reviews or testimonials	Needs work
FAQ / answer content	Present
Dedicated service pages	Needs work
Location or audience signal	Needs work

Suggested next step

Fix the top 2-3 issues first, then rerun the audit. The goal is to make the site easier for customers, Google, and AI answer engines to understand before investing in heavier SEO or AI visibility work.
