

AI WEBSITE AUDIT / SMALL BUSINESS READINESS

Your AI search readiness report

sourcechirodenver.com

Prepared by Illusion on 2026-05-25

86 Overall	91 User Experience	84 SEO / Local	84 AI Search
---------------	-----------------------	-------------------	-----------------

Executive summary

The site has a solid foundation for customers and AI search. The next gains come from adding more specific service, location, FAQ, and trust proof signals.

The fastest wins are usually clarity, trust, crawlability, structured data, and answer-style content - not expensive enterprise theater.

Why this audit matters

Customers are starting to search differently. Instead of only typing keywords into Google, many now ask AI tools direct questions like 'who should I hire?' or 'what company can help me with this?' To show up in those answers, your website needs to make your business easy to understand: clear services, location or audience signals, trust proof, structured content, and obvious next steps.

This audit checks whether your site gives Google and AI tools enough information to confidently understand and recommend your business.

Top fixes to prioritize

1. Add LocalBusiness or ProfessionalService schema: Add JSON-LD with business name, URL, phone, address/service area, opening hours, and sameAs profiles.
2. Add reviews or testimonials: Add 2-4 real customer testimonials, review snippets, or links to Google Business reviews.

What Illusion checks

Service clarity, location or audience clarity, trust signals, crawlability, structured data, FAQ answerability, CTA clarity, content depth, and AI crawler access. This PDF does not include Lighthouse or Core Web Vitals testing.

How Illusion helps after the audit

Illusion helps small businesses answer a simple question: when potential customers ask Google or AI tools for recommendations, does your business show up - or do your competitors? The first step is making sure your website clearly explains what you do, who you help, why someone should trust you, and how to contact you.

Once the basic website fixes are live, Illusion can track whether AI answer engines actually mention the business for the questions customers ask.

Detailed Findings

1. Add LocalBusiness or ProfessionalService schema

HIGH / STRUCTURED DATA

Evidence: Detected schema types: none

Fix: Add JSON-LD with business name, URL, phone, address/service area, opening hours, and sameAs profiles.

Expected impact: Structured data helps Google and AI systems confidently identify the business entity.

Effort: medium

2. Add reviews or testimonials

MEDIUM / USER EXPERIENCE

Evidence: No review/testimonial language was detected.

Fix: Add 2-4 real customer testimonials, review snippets, or links to Google Business reviews.

Expected impact: Trust proof matters for humans and gives AI systems third-party-style evidence to summarize.

Effort: low

Signals And Pages

Business signals

Signal	Status
Crawlable email or phone	Present
Visible call to action	Present
Reviews or testimonials	Needs work
FAQ / answer content	Present
Dedicated service pages	Needs work

Our Team Mysite https://www.sourcechirodenver.com/our-team	status 200 / 146 words / 0 H1 / 0 schema

Suggested next step

Fix the top 2-3 issues first, then rerun the audit. The goal is to make the site easier for customers, Google, and AI answer engines to understand before investing in heavier SEO or AI visibility work.
