AI Search

Executive summary

The site has a solid foundation for customers and AI search. The next gains come from adding more specific service, location, FAQ, and trust proof signals.

The fastest wins are usually clarity, trust, crawlability, structured data, and answer-style content - not expensive enterprise theater.

Why this audit matters

Customers are starting to search differently. Instead of only typing keywords into Google, many now ask AI tools direct questions like 'who should I hire?' or 'what company can help me with this?' To show up in those answers, your website needs to make your business easy to understand: clear services, location or audience signals, trust proof, structured content, and obvious next steps.

This audit checks whether your site gives Google and AI tools enough information to confidently understand and recommend your business.

Top fixes to prioritize

1. Make the main headline more specific: Add the service, audience, and location instead of using a short brand-only headline.
2. Create dedicated service pages: Create one page per main service with who it is for, what is included, pricing cues, FAQs, and a CTA.
3. Add reviews or testimonials: Add 2-4 real customer testimonials, review snippets, or links to Google Business reviews.

What Illusion checks

Service clarity, location or audience clarity, trust signals, crawlability, structured data, FAQ answerability, CTA clarity, content depth, and AI crawler access. This PDF does not include Lighthouse or Core Web Vitals testing.

How Illusion helps after the audit

Illusion helps small businesses answer a simple question: when potential customers ask Google or AI tools for recommendations, does your business show up - or do your competitors? The first step is making sure your website clearly explains what you do, who you help, why someone should trust you, and how to contact you.

Once the basic website fixes are live, Illusion can track whether AI answer engines actually mention the business for the questions customers ask.

Detailed Findings

1. Make the main headline more specific

MEDIUM / CONTENT

Evidence: Current H1: "Santee Chiropractic Clinic"

Fix: Add the service, audience, and location instead of using a short brand-only headline.

Expected impact: Improves human comprehension and AI answer quality.

Effort: low

2. Create dedicated service pages

MEDIUM / CONTENT

Evidence: The crawl did not find obvious service pages.

Fix: Create one page per main service with who it is for, what is included, pricing cues, FAQs, and a CTA.

Expected impact: Specific service pages give AI systems quotable evidence and give customers a clearer path.

Effort: medium

3. Add reviews or testimonials

MEDIUM / USER EXPERIENCE

Evidence: No review/testimonial language was detected.

Fix: Add 2-4 real customer testimonials, review snippets, or links to Google Business reviews.

Expected impact: Trust proof matters for humans and gives AI systems third-party-style evidence to summarize.

Effort: low

4. Add a short FAQ section

MEDIUM / AI SEARCH

Evidence: No FAQ-style content was detected.

Fix: Add answers to common buyer questions: pricing, turnaround time, who you serve, and when to contact you.

Expected impact: Question-answer content maps directly to how people ask ChatGPT, Claude, and Google AI Overviews.

Effort: low

Signals And Pages

Business signals

Signal	Status
Crawlable email or phone	Present
Visible call to action	Present
Reviews or testimonials	Needs work
FAQ / answer content	Needs work
Dedicated service pages	Needs work
Location or audience signal	Present
Useful local/business schema	Present
Sitemap discovered	Present
AI crawler blocks detected	None detected

Pages crawled

Page	Signals
Santee Chiropractic Clinic https://www.santeechiropractic.com/	status 200 / 501 words / 1 H1 / 3 schema

Suggested next step

Fix the top 2-3 issues first, then rerun the audit. The goal is to make the site easier for customers, Google, and AI answer engines to understand before investing in heavier SEO or AI visibility work.
